*Questions 36 – 40**Complete the summary below.**Write NO MORE THAN THREE WORDS AND/OR A NUMBER for each answer.*

The turkey industry is made up of primary breeders, breeders and producers. The primary breeders select the best individual turkeys and so maintain and develop the **36 ..genetic (stock)...** quality of the population. Parent stock is typically sold to breeders as hatching eggs or **37 ...turkey chicks....** ('poults') to breeders.

Breeders take special interest in bird mobility, reproduction and growth. They mate **38parents.....** purchased from the **39 ..primary breeder..** and select only the best stock to be

hatched.

The turkey producers consist of larger companies who produce turkeys all year and smaller companies who produce for the seasonal market. The larger producers account for 90 percent of the market and the smaller companies for 10%. In the UK, the larger market segment is dominated by **40 ..3 / three major companies..** The busiest time of the year for producers is the latter part of the year.
